Haidy Mohamed Adel

Data Analyst | AI & Data Science Graduate

haidyadel1658@gmail.com 01140557879 Cairo , Egypt

linkedin.com/in/haidy-mohamed-129958315

Professional Summary

Detail-oriented Data Analyst and Computer Science graduate specializing in Artificial Intelligence with strong analytical, quantitative, and problem-solving skills. Proficient in data cleaning, data transformation, SQL querying, Power BI dashboard construction, and Excel reporting. Experienced in manipulating large data sets with Pandas and NumPy to support data research, performance evaluation, data-driven decision-making, and analytical management.

Education

Ahram Canadian University 10/2021 – 06/2025
Bachelor's Degree in Computer Science 6th of October City, Cairo
Major: Artificial Intelligence
GPA: Good

Professional Experience

Junior Data Analyst Trainee, *Digital Egypt Pioneers Initiative (DEPI) — MCIT* 07/2026 – Present

- **Core Focus:** Foundations of Data Analytics, Data-Driven Decision Making, and Data Governance.
- **Technical Execution:** Hands-on data preparation, cleaning, and analysis using SQL and Python.
- **Visualization & BI:** Building interactive dashboards and reports using Microsoft Power BI and Tableau.
- **Advanced Skills & Capstone:** Applying Prompt Engineering to optimize workflows and executing a hands-on Capstone Project

Certificates

- **IBM Data Fundamentals** — IBM (2026)
- **Artificial Intelligence** — Information Technology Institute (ITI) (2024)
- **Applied Deep Learning** — Mahara Tech Certificate (2026)
- **Python Programming (Basic)** — Mahara Tech Certificate (2026)
- **Data Analytics Trainee Certificate – DEPI** — Digital Egypt Pioneers Initiative (MCIT) (2026)

Skills

Technical Skills:

• **Programming Languages:** Python, SQL, Computer Science Fundamentals, Programming languages.
• **Data Analysis & Big Data:** Large Data Sets Handling, Data Cleaning, Data Validation, Data Processing, Analytics, Research, Evaluate performance, Proficiency with computers ,Identify trends.
• **BI & Tools:** Power BI, MS Office (Excel, Word, PowerPoint), Power Query, Tableau, Dashboards, Interactive Presentations.
• **Mathematics & AI:** Applied Mathematics, Machine Learning, Deep Learning, Feature Engineering, TensorFlow, Keras, OpenCV, Computer Vision, Pandas, NumPy.

Soft Skills & Competencies:

• **Analytical & Management:** Critical Thinking, Analytical Thinking, Problem solving skills, Performance Monitoring, Decision Support, Project Management.
• **Interpersonal Skills:** Effective Communication, Communicative, Collaborative, Teamwork, Creativity, Insightful, Detail-Oriented, Accuracy.

Projects

Camp Population & Housing Analytics Dashboard: 08/2026

Practical Project | Tools & Technologies: Microsoft Excel, Data Cleaning, Pivot Tables, Dashboards

- Executed an end-to-end data pipeline in Excel on camp population dataset, handling missing values (imputation) and text normalization using TRIM.
- Constructed logical calculated columns (Male/Female %, Avg Occupancy Density, Year extraction) with structured table formulas and zero-division handling.
- Aggregated demographic and housing data using dynamic Pivot Tables to summarize country overviews, housing capacities, and temporal population growth.
- Designed an executive interactive Dashboard featuring column, donut, and line charts with cross-connected Slicers for real-time dynamic filtering.

Superstore Sales Analytics Dashboard: 08/2026

Academic Project | Tools & Technologies: Power BI, Power Query, DAX, Excel

• Built an end-to-end interactive Power BI dashboard to analyze retail sales performance, profit margins, regional trends, and customer metrics.
• Cleaned and transformed raw dataset in Power Query by removing duplicates/nulls, adjusting data types, and adding a custom calculated column for Shipping Days.
• Formatted financial metrics and authored key DAX measures including Total Sales, Total Profit, Profit Margin %, Total Orders, and Average Sales.
• Designed 5 KPI cards, 6 dynamic visuals (Category, Region, Sub-Category, State Map, Monthly Trend Line, Top 10 Customers), and interactive slicers for data-driven decisions.

Sales Data Analysis & Reporting (Excel): 07/2026

Practical Project | Tools & Technologies: Microsoft Excel, Pivot Tables, Conditional Formatting

• Analyzed raw sales data to summarize total and average revenue across regions and product categories.
• Built interactive Pivot Tables and created Calculated Fields to evaluate regional and product-level performance.
• Performed time-series data grouping by Year, Quarter, and Month to identify seasonal sales trends and patterns.
• Applied Conditional Formatting and integrated interactive Slicers to highlight top-performing categories and enable dynamic filtering.

Medical Corner – AI-Powered Healthcare Mobile Application Graduation Project 01/2025 – 06/2025

Tools: Python, TensorFlow, Keras, Flutter, Firebase, NumPy, Pandas

• Developed an AI-powered healthcare mobile application integrating deep learning and predictive analytics.

• Built convolutional neural network (CNN) models for medical image classification and machine learning models for disease risk prediction using structured data, achieving up to 89% validation accuracy and 79% accuracy on CNN classification.

• Implemented data preprocessing and feature engineering to improve model performance.

• Integrated AI models into a Flutter-based mobile application, enabling AI-driven disease risk predictions for over 1,000 patient records.

Image Classification Using Computer Vision Feature Extraction Techniques 04/2025 – 05/2025

Team Project | Tools & Technologies: Python, OpenCV, Scikit-learn, TensorFlow

- Built an image classification pipeline using handcrafted features (Harris, SIFT, HOG) with traditional ML models, achieving up to 56% accuracy.
- Improved performance to 87–91% using transfer learning (MobileNetV2, DenseNet121).
- Compared ML and DL models to evaluate manual vs. automated feature extraction.
- Collaborated in a team of 5, gaining experience in model experimentation and problem-solving.
